## PHPSpec Manual (Work In Progress)

Just a quick update. I started writing a draft manual recently, so I'm publishing it online at:

<http://dev.phpspec.org/manual>

I'll keep adding to it over the days, weeks and months ahead. The current form is going to be mainly a draft. When it's done, I'll go through it and do some serious editing. Next priority is getting in the material on actually using and implementing PHPSpec...

I was wondering if you can make a PDF version of the manual. Thanks! Keep up the good work! Anonymous on Nov 7 2007, 02:34

I'll look into it. If I can add that in as a task to Phing (even if it's all command line calls) it would at least be automated
